To Whom It May Concern:

I have been doing business with Spirco Manufacturing since 1994 and have purchased approximately 50 projects from them. I have done a wide range of building types including retail, commercial, agricultural, and self storage. Without a doubt, Spirco's quality has always been excellent and the customer service before and after the sale has been great as well. If there have been any issues with my projects, Spirco has always solved them in a timely fashion. As a developer, I appreciate Spirco's knowledgeable employees working with me to come up with design ideas to help cut cost and save with erection time. I look forward to working with Spirco in the future and I have already told them that I have future projects coming in 2011.
