

To: Spirco Manufacturing

I have been doing business with Spirco Mfg. for approximately 9 years and can honestly say that they are exactly as they advertise a company of integrity. During the 9 years I have not had one time to say that I thought I was cheated or treated unfairly, most of the time Spirco went above and beyond what they should do. Any time you design build and ship something the size of some of the buildings I have purchased there can always be problems, and that is one of the areas that Spirco far exceeds the competition in that there is a problem they will do everything possible to solve the problem as quickly as possible. The buildings that I have purchased and erected from Spirco have always been very well made and erector friendly, such as welded on clips on the columns and rafters as opposed to some of the other metal building manufacturers which have all bolt on clips, which in turn take more time for erection and creates more movement in the structure till it is tightened. This is just a couple of reason why I think that Spirco is ahead of the competition and I look forward to many more years of doing business together.

Thank you,
